Ted,

Please see the attached P&A form. I know that you are planning to cement to surface in the event of plugging a well, but I wanted the form to be abundantly clear. I penned in what would be the bottom of plug depths, so plug one is from 8050-8600, and plug two is from surface to 8050 as noted in other parts of the application. Please verify that this is correct, and reply to me via email to confirm that you concur with the form.

Thanks,
Andrew
